This webinar will provide hands-on tangible instruction of specific trauma-informed interventions you can use with your clients to help them cope with the COVID 19 pandemic. Relevant research findings from previous pandemics will be reviewed to help inform mental health interventions during the pandemic. Dr. Fatter will demonstrate specific interventions for hyper-arousal symptoms to help manage anxiety and emotional overwhelm and specific interventions for hypo-arousal symptoms to help manage shock, dissociation and emotional shut down. This webinar will be largely experiential so that participants can get a felt sense of how it feels to practice these interventions. Dr. Fatter will teach bilateral tapping (an interventions from EMDR), somatic interventions, and specific breathing techniques to help increase a sense of safety and connect to sense of resilience and relational support to mitigate the impact of social isolation. Dr. Fatter will offer ways to use sensory input from items in one's home to help clients self-soothe. In addition, Dr. Fatter will describe two cognitive interventions to help clients' cope with rumination and nervous system activation. Mindfulness resources and use of ritual will also be discussed as a means to connect to one's external environment and help with the regulation of collective grief.

Learning Objectives

At the end of this seminar, participants will be able to:
1. Describe relevant research findings from previous pandemics that inform mental health care for the COVID 19 pandemic.
2. Describe how news and social media exposure can lead to poor mental health outcomes.
3. Identify specific interventions for specific client hyper-arousal vs hypo-arousal symptoms.
4. Utilize bi-lateral stimulation to help clients connect to a sense of safety and connect to relational resources to mitigate the impact of social isolation.
5. Demonstrate 2 somatic resources to teach your clients to decrease anxiety.

Outline

Begin 11 AM ET
What We Know From Previous Pandemics
Practices for Stabilization
Bi-Lateral Stimulation Resources
Break 12:30-12:45 PM ET
Somatic Resources & Breathing Techniques
Sensory Resources
Cognitive Resources
Mindfulness Resources & Use of Ritual
Containment Visualization
End 2:15 PM ET

Our seminars are available in two formats: The first is a live, interactive webinar. If the webinar time is not convenient for you, you can purchase the Home Study version: It is a recorded version of the webinar. You will have to pass a test to earn CE’s for both the live webinar and the Home Study version.
