The Practice of Tele-mental Health and Use of Social Media: Ethical, Legal, and Clinical Issues for Practitioners

A wide range of technologies to include the Internet, e-mail, text messaging, social media, Apps, and the like have altered how most individuals communicate with each other, stay connected, and form and maintain relationships, to include in mental health practice.

This workshop will provide information about the ethical, legal, and clinical issues relevant to integrating various technologies into our practices. Additionally, common pitfalls and areas where the use of various technologies, to include social media, is contraindicated will be discussed.

Research on how various technologies may be effectively integrated into clinical practice to treat a wide range of presenting problems and disorders is reviewed and their implications for our practices is discussed.

Guidance on decision-making for when and how to do this is provided to include the provision of clinical services across distances and the use of various technologies to enhance or augment in-person services. Clinical examples are provided to illustrate some of the benefits and challenges of utilizing these technological innovations in clinical practice.

Learning Objectives

At the end of this seminar, participants will be able to:
